

Independent reviewer gate scorecard

MARA-CR-001 | Governed evidence status and execution worksheets

Current state	Local acceptance	Human gates	Ready to share
Ledger synchronized	10 of 10 verified	0 of 3 passed	NO

This scorecard defines an independent review workflow. Blank fields, generated questions, and local build checks are not human review, approval, legal validation, or evidence that a gate passed.

Instructions

Assign each page to a reviewer who meets the stated role. The reviewer completes the questions, records evidence, marks each criterion, and signs or identifies themselves. Record the governed result with scripts/record_reviewer_gate.py and transfer the response into artifacts/feedback-log.md. Rebuilding this scorecard never changes reviewer evidence or readiness status.

HG-01 - Independent calculation reproduction

Reviewer role: Independent second reader with financial-model review experience

Objective

Reproduce the base collateral cap without using the workbook result as an input.

Required review inputs
4,000,000 fictional USDC
\$1.00 reference price
2% stress
50 bps execution cost
25 bps delay cost
\$20,000 fixed cost
1.25x coverage

Review questions

1. What available proceeds did you calculate?

Response: _____

2. What unrounded collateral cap did you calculate?

Response: _____

3. Which assumption most affects the result?

Response: _____

4. Did any instruction or label create ambiguity?

Response: _____

Pass criteria

Result	Criterion
☐ Pass ☐ Fail	Available proceeds equal \$3,870,600 within \$1
☐ Pass ☐ Fail	Collateral cap equals \$3,046,480 within \$1
☐ Pass ☐ Fail	Reviewer documents independent steps and identifies any ambiguity

Required retained evidence

Dated calculation steps, reviewer role, result, variance, conclusion, and permission to attribute the review role

Reviewer record

Reviewer name / identifier	
Reviewer role	
Review date	
Attribution permission	☐ Yes ☐ No ☐ Role only
Conclusion	☐ PASS ☐ FAIL ☐ NEEDS WORK
Evidence location	
Required follow-up	

HG-02 - Unscripted presentation assessment

Reviewer role: Observer who did not build the case

Objective

Assess whether the presenter can explain the recommendation, strongest opposing view, evidence boundary, and funding gate without reading a script.

Required review inputs
Committee packet
Reviewer brief
Decision view

Review questions

1. Why is the recommendation \$3.0 million rather than \$5.0 million?

Response: _____

2. Why can a conditional recommendation still be blocked from funding?

Response: _____

3. What is the strongest case for decline?

Response: _____

4. What evidence would reverse the decision?

Response: _____

Pass criteria

Result	Criterion
☐ Pass ☐ Fail	All four questions answered accurately without a script
☐ Pass ☐ Fail	Fictional inputs and public facts remain clearly separated
☐ Pass ☐ Fail	Observer records misunderstandings and follow-up actions

Required retained evidence

Dated observer notes, reviewer role, question-level result, conclusion, and any corrective action

Reviewer record

Reviewer name / identifier	
Reviewer role	
Review date	
Attribution permission	☐ Yes ☐ No ☐ Role only
Conclusion	☐ PASS ☐ FAIL ☐ NEEDS WORK
Evidence location	
Required follow-up	

HG-03 - Attributed external practitioner feedback

Reviewer role: Authorized external credit, legal, collateral, or portfolio practitioner

Objective

Obtain substantive feedback on the decision, control design, or evidence needed to change the recommendation.

Required review inputs
Reviewer brief
Committee packet
Relevant supporting artifact requested by reviewer

Review questions

1. Which decision assumption would you challenge first?

Response: _____

2. What specific evidence would change your conclusion?

Response: _____

3. Which control or remedy is operationally unrealistic?

Response: _____

4. May the reviewer role and response be attributed in the project log?

Response: _____

Pass criteria

Result	Criterion
☐ Pass ☐ Fail	Response comes from an actual external practitioner
☐ Pass ☐ Fail	Reviewer role and permission are recorded accurately
☐ Pass ☐ Fail	Feedback, change made, and remaining disagreement are logged without embellishment

Required retained evidence

Dated attributed response or contemporaneous notes, permission status, resulting change, and unresolved disagreement

Reviewer record

Reviewer name / identifier	
Reviewer role	
Review date	
Attribution permission	☐ Yes ☐ No ☐ Role only
Conclusion	☐ PASS ☐ FAIL ☐ NEEDS WORK
Evidence location	
Required follow-up
